

Latte Made Easy

High quality frothed milk made easy

FrieslandCampina is a milk expert and one of the largest dairy companies in the world. As a cooperative of member dairy farmers, we manage the entire supply chain 'from grass to glass'.

The popularity of cappuccino and latte macchiato has grown enormously in recent years, leading to an increased demand for great quality frothed milk. Consumers in cafés, bars and restaurants have come to expect high quality barista-style drinks. Consistency is paramount in delivering excellent cappuccino and latte to your customers and varying grades of frothed milk can impact their experience. Luckily, FrieslandCampina has the solution.

INNOVATION

Frothed milk revolution

The perfect latte will keep your customers coming back for more. And because not all your staff are qualified baristas, FrieslandCampina has developed the Lattiz®: a machine that delivers consistent barista-quality frothed milk to meet the demands of this growing market.

At the push of a button, Lattiz® delivers frothed milk for six cappuccinos per minute to meet peak demand. The innovative frothing technology guarantees constant, velvety smooth frothed milk for a range of latte types, making Lattiz® the ultimate revolution in frothed milk for the hospitality industry.

The **barista standard** for success

'Bad milk can ruin a good coffee.'

No matter who is operating the machine, Lattiz® guarantees constant high quality. Frothed milk from Lattiz® offers exceptional flavour and appearance, complimenting and enhancing your coffee. In short, Lattiz® is the fastest way to achieve constant barista-quality frothed milk for cappuccino and latte.

I PUSH
of the button

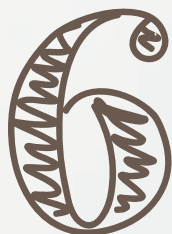

Discover just **how easy** it is

In the past you would have needed a top-class barista, now any member of staff can create the perfect frothed milk.

One push of a button delivers you exceptional barista-quality frothed milk every time. The machine has just six easy buttons to provide the perfect frothed milk for cappuccino, latte macchiato, flat white etc. Each button can be easily adjusted for cup size, delivering the exact amount of milk required. The Lattiz® gives you 100% barista service, all day, every day.

CAPPUCCINO'S
per minute!

Quick and good

Time is money and your customers value quick service. A win-win situation with potential for your future, because a happy customer will keep coming back for more.

Lattiz® enables you to serve a top quality cappuccino in just seconds. So you can welcome extra customers without worry. The machine's astonishing capacity to create 6 cappuccinos per minute will keep you smiling even at your busiest times. And time-consuming cleaning is a thing of the past with the efficient bag-in-box system and automatic flush system. Lattiz® makes success simple: 'Latte Made Easy'. Time and time again.
